

CYO Camp Howard Paddle Club Membership Through the ACA (American Canoe Association)

The ACA provides valuable services to the paddlesports community through its educational programs for paddlers, representation of paddlers on stewardship and public policy issues, and facilitation of paddlesports recreation. There are many ways that the ACA and paddling clubs work together and benefit from each other. This is the case with over 150 clubs currently affiliated with the ACA as Paddle America Clubs. There are a number of benefits to being a PAC. Your club is promoted and supported through ACA publications and the ACA website. The ACA also provides the club with access to expertise in stewardship and public policy, safety education and instruction, recreation, and athletic competition.

An ACA Paddle America Club is an association where all of the active club members are also members of the ACA. The ACA offers Paddle America Club member's full ACA membership benefits at a discounted price. The participant may elect to join the ACA with an annual membership or by single event. By virtue of membership enrollment into the ACA, the participant will become a member of the CYO Camp Howard Paddle Club.
